Wiring Diagram

The wiring diagram consists of individual wiring diagrams and overview

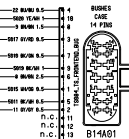

Sheets for ground points, components, plugs, connector points, relay holders and fuses. The individual wiring diagrams are divided up into coordinate fields.

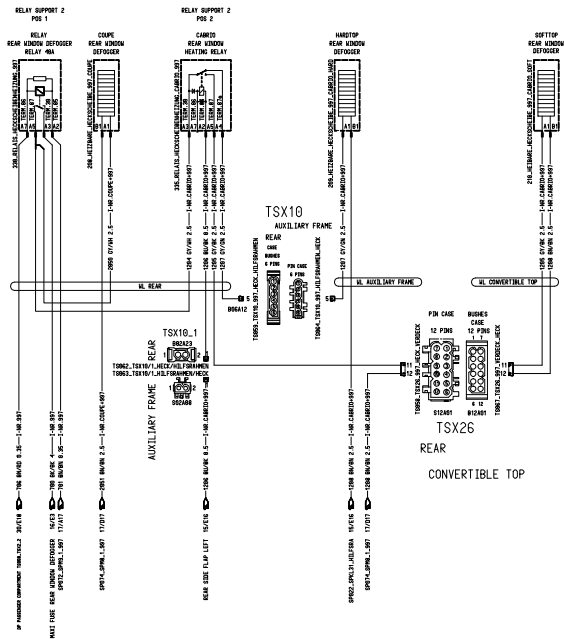

The earth/ground points are identified by "GP" and their location is shown in a vehicle diagram.

The connectors are identified by an X and a number.

Wherever wires branch to another page, the coordinates and, in certain cases, the terminal markings are indicated.

The feed wire of wire joints and bridge connectors is indicated by an arrow.
